14-Port Gigabit Industrial L2 Managed PoE Switch

Datasheet

Key Features:

Ports: Provide 8*10/100/1000Mbps PoE ports with 2*10/100/1000M RJ45 and 4*1.25Gbps SFP Uplink

PoE Standard: IEEE802.3af/at Power over Ethernet (PoE) Compliant **Self-adaption:** RJ45 port supports 10/100/1000Mbps Auto MDI/MDIX

Industrial Installation: Din Rail mounting installation

Wide Application: Designed for Railway, traffic etc some Industrial environment **Surge protection:** Protect the device from lighting surges and others electrical hazards **Managed:** Support remote web managed, VLAN and storm control and IPV6 management etc.

Working Temperature: -40 to 85 degrees operating temperature **Considerate Design:** IP40 Industrial design with dual power input

Environmentally Hardened Design

With the **IP40** metal industrial case which provides a high level of immunity against electromagnetic interference and heavy electrical surges,Being able to operate under the temperature range from **-40 to 85 degrees C**, the BI8208PGM2G4F can be placed in almost any difficult environment.

Surge Protection Design

provides contact discharge of ±8KV DC and air discharge of ±15KV DC for Ethernet ESD protection. It also supports ±6KV surge immunity to improve product stability and protects users' networks from devastating ESD attacks, making sure the flow of operation does not fluctuate.

Cost-effective IPv6 Managed Gigabit PoE Switch Solution

With layer 2+ managed Gigabit PoE Switch, It provides IPv6/IPv4 management and built-in L2/L4 Gigabit Switching engine, and supports high-speed transmission of surveillance images and videos.

Gigabit SFP Uplink Port

With 4 SFP module slot available, the SFP uplink port is ideal for connecting the switch to the network's backbone, providing more than enough bandwidth and stability for ultra high speed data transferring, Beside the SFP can transmitte the date with Max 100Km distance with more economic solution
